

Traffic Management Plan

This plan has been developed in consultation with the bus inspector allocated to the school by Bus Eireann. It takes into account the unique and growing requirements of the school. As a result, the following have been adopted:

- Clear signage displays that the driveway up to the school is closed for vehicular access from 08:00-16:00
- From 8AM the first teacher on site physically closes the driveway with traffic management cones.
- These cones remain in place for the whole day.
- Buses deliberately double park at the front of the building to ensure that access to other parts of the site are physically not possible at this time.
- All children access the bus from the passenger side door.
- Clear signage is in place on the site restricting access to buses with the threat of clamping in place
- All students are met from the bus to school by a designated staff member.
- The designated staff member also ensures that their child gets on the bus safely.
- Securing of seat belts is the escorts responsibility.
- The bus cannot be driven off until all belts are secured.
- At all times the bus driver is responsible for health and safety on the bus.
